

Using PowerTeacher Mobile app for iPad

1. **To install the app on an LSC-managed iPad:** If using an LSC-managed iPad, tap the Self Service app. PowerTeacher Mobile should be available for installation on LSC teacher iPads using Self Service. Tap the Install button next to PowerTeacher Mobile to install. **To install the app on a personally-owned device:** Search for PowerTeacher Mobile in the App Store.
2. Once the app is installed, locate the PowerTeacher icon on the home screen and tap on it. On first launch, you will be prompted to search for your district's server settings. Tap Yes.
3. You will then be prompted to whether or not to allow PowerTeacher to use Current Location. Tap OK. If you are physically located in the Greater Lafayette area when PowerTeacher Mobile is first launched, Lafayette School Corporation should show up as a nearby PowerSchool District. Tap on Lafayette School Corporation. If you are physically located outside the Greater Lafayette area when using PowerTeacher Mobile for the first time, the settings will not be found, but you will be given the option to search by Zip Code. We have associated this server with the Zip Code 47905.

4. Once you have located the district's server settings, you will be returned to the login screen. Tap on the School field and select your school. You should again be returned to the login screen. Login to PowerTeacher Mobile with your existing PowerSchool login and password. It may take up to 45 seconds to log you in. Please refer to existing training on how to use PowerTeacher Gradebook.

As a final note: After you have finished using PowerTeacher Mobile, don't forget to log out. Tap on the circular icon with the running man located at the top right-hand side of the screen. The icon is highlighted in yellow on the above right picture.
