

Garage Band

On the right side, are your pre-recorded selections. Click and drag them to the middle where you want them in your new tune. You can add depth to your tune by adding layers; there are multiple rows where you can place your music choices.

You can copy and paste selections like you do in a word doc.

To repeat a selection - hold cursor on the top right corner of the blue rectangle. Once you see the circular arrow, hold and move cursor to the right.

To record your voice or an instrument you are playing:

- use the + sign at the bottom left corner or
- set the red line cursor at the place in your tune where you want to begin recording. Press the red circle button to record.

Insert songs from your itunes library and record over those too - Click on the bottom right corner, the last of the 3 icons is a film strip/music note.
