

COVID-19 Prevention Program (CPP)

North Cow Creek School District

This CPP is designed to control employees' exposures to the SARS-CoV-2 virus (severe acute respiratory syndrome coronavirus 2) that causes COVID-19 (Coronavirus Disease 2019) that may occur in our workplace.

Date: May 13, 2022

Authority and Responsibility

North Cow Creek Elementary School District has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the Appendix A: Identification of COVID-19 Hazards form.
- Document the vaccination status of our employees by using Appendix E: Documentation of Employee COVID-19 Vaccination Status, which is maintained as a confidential medical record.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Develop COVID-19 policies and procedures to respond effectively and immediately to individuals at the workplace who are a COVID-19 case to prevent or reduce the risk of transmission in the workplace

- Review applicable orders and general and industry-specific guidance from the State of California, Cal/ OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the Appendix B: COVID-19 Inspections form as needed to identify and evaluate unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

Employee Participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by:

Utilizing email, staff meetings, and work order protocols to request PPE, communicate repairs, identify solutions to exposure areas, and request purchases or accommodations to remove hazards.

The custodian and principal/superintendent used Appendix B to evaluate the facility for COVID exposures.

Employee Screening

We screen our employees and respond to those with COVID-19 symptoms by:

Employees will self-screen according to CDPH guidelines prior to entering a work/school site.

The school will:

- * complete daily visual checks,
- * take temperatures, as needed,
- * and test staff members on-site if required by law.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the Appendix B: COVID-19 Inspections form, and corrected in a timely manner based on the severity of the hazards, as follows:

See Appendix B.

The principal and the custodian will complete Appendix B and work together to correct any exposures immediately. Staff will be asked to report any exposures immediately, so the principal and custodian can correct the exposure.

The severity of the hazard will be assessed and correction time frames assigned, accordingly.

A COVID Coordinator facilitates all things COVID (quarantines, notifications, testing, etc.)

Individuals are identified as being responsible for timely correction.

Follow-up measures are taken to ensure timely correction.

Controls of COVID-19 Hazards

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees that are not fully vaccinated when they are indoors or in vehicles, and where required by orders from the California Department of Public Health (CDPH).

Changes were made to face covering requirements (Cal. Code Regs., tit. 8, § 3205(c)(6))

After March 11, 2022, the universal masking requirement for K-12 and Childcare settings terminated.

CDPH currently strongly recommends that individuals in these settings continue to mask in indoor settings. Masking will continue to be an important layer of protection along with the continued recommendations around vaccinations, testing and ventilation, to keep schools a safe environment, even as case rates and hospitalizations decline.

Face shields are available for staff members, upon request.

Disposable masks and N-95 will be available if an employee chooses to wear a face covering.

In addition, employees can request face coverings from the employer at no cost to the employee and can wear them at work, regardless of vaccination status, without fear of retaliation, as specified in section 3205(c)(5)(J).

Employees required to wear face coverings in our workplace may remove them under the following conditions:

- When an employee is alone in a room or a vehicle.
- While eating or drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent feasible.
- When employees are required to wear respirators in accordance with our respirator program that meets section 5144 requirements.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Such employees will wear an effective, non-restrictive alternative, such as a face shield with a drape on the bottom, if their condition permits it. If their condition does not permit it, then the employee will be at least six feet apart from all other persons and either fully vaccinated or tested at least weekly for COVID-19.
- Specific tasks that cannot feasibly be performed with a face covering. This exception is limited to the time in which such tasks are being performed.

Any employee not wearing a required face covering will be at least six feet apart from all other persons unless the unmasked employee is either fully vaccinated or tested at least weekly for COVID-19.

We will not prevent any employee from wearing a face covering when it is not required unless it would create a safety hazard, such as interfering with the safe operation of equipment.

Face coverings will also be provided to any employee that requests one, regardless of their vaccination status.

Engineering controls

For indoor locations, using Appendix B, we identify and evaluate how to maximize, to the extent feasible, ventilation with outdoor air using the highest filtration efficiency compatible with our existing ventilation system, and whether the use of portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems, would reduce the risk of transmission by:

Partitions/barriers. Employers no longer need to consider the use of barriers or partitions to reduce COVID-19 transmission in outbreaks. These requirements have been deleted. (Cal. Code Regs., tit. 8, § 3205.1(d)(3))

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces and objects, such as doorknobs, elevator buttons, equipment, tools, handrails, handles, controls, phones, headsets, bathroom surfaces, and steering wheels:

Although we will continue to maintain our cleaning protocols, the cleaning and disinfecting requirements for COVID were deleted (Cal. Code Regs., tit. 8, § 3205(c)(7))

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

Cleaning and disinfecting requirements were deleted and no longer required. (Cal. Code Regs., tit. 8, § 3205(c)(7))

Hand sanitizing

In order to implement effective hand sanitizing procedures, we:

Evaluating and installing hand-sanitizer stations throughout the schools.

Distributing hand-sanitizer and soap in every classroom and common areas.

Signage about proper handwashing is posted.

Encouraging hand washing before students eat and after recess.

Modeling proper hand washing protocols with students.

Encouraging and allowing time for employee and student handwashing.

Providing employees with an effective hand sanitizer, and prohibit hand sanitizers that contain methanol (i.e. methyl alcohol).

Encouraging employees and students to wash their hands for at least 20 seconds each time.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

Upon request, we provide respirators for voluntary use to all employees who are not fully vaccinated and who are working indoors or in vehicles with more than one person.

If required by law and upon request, we will provide respirators for voluntary use to all employees regardless of vaccination status and who are working indoors or in vehicles with more than one person.

All employees have necessary PPE to fulfill their job duties (including eye protection and respiratory protection when necessary) The district has ample supply of face masks, face shields with drapes, gloves, goggles and disposable gowns for identified personnel assisting with health protocols.

Partitions/barriers. Employers no longer need to consider the use of barriers or partitions to reduce COVID-19 transmission in outbreaks. These requirements have been deleted. (Cal. Code Regs., tit. 8, § 3205.1(d)(3))

We provide and ensure use of respirators in compliance with section 5144 when deemed necessary by Cal/OSHA.

We also provide and ensure use of eye and respiratory protection when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids.

Testing of symptomatic employees

We make COVID-19 testing available at no cost to all employees who had close contact in the workplace and have COVID-19 symptoms, during employees' paid time.

Investigating and Responding to COVID-19 Cases

We have developed effective procedures to investigate COVID-19 cases that include seeking information from our employees regarding COVID-19 cases, close contacts, test results, and onset of symptoms. This is accomplished by using the Appendix C: Investigating COVID-19 Cases form.

We also ensure the following is implemented:

COVID-19 testing must be made available to all employees with COVID-19 symptoms. As with respirators, this now applies to all employees regardless of vaccination status whereas previously it only applied to unvaccinated employees (Cal. Code Regs., tit. 8, § 3205(c)(7)(D)).

Exclusion of employees who had close contact. The detailed prescriptive requirements for exclusion of employees after close contact have been deleted. Instead, employers must review CDPH guidelines for employees who had close contact and implement quarantine and other measures in the workplace to prevent COVID-19 transmission in the workplace. This allows for greater flexibility in the regulations (Cal. Code Regs., tit. 8, § 3205(c)(9)). For more information, please refer to the section on CDPH's Isolation and Quarantine Guidance in the general FAQs, and to Cal/OSHA's fact sheet on quarantine and isolation.

Exclusion of employees with COVID-19. The requirements for employees who test positive for COVID-19 have been updated to reflect the most recent April 6, 2022 CDPH Isolation and Quarantine Guidance. Regardless of vaccination status, employees who test positive can return to work after 5 days if the employee has a negative test, symptoms are improving, and they wear a face covering at work for an additional 5 days. Otherwise most employees can return after 10 days. (Cal. Code Regs., tit. 8, § 3205(c)(10)). For more information, please refer to the section on CDPH's Isolation and Quarantine Guidance in the general FAQs, and to Cal/OSHA's fact sheet on quarantine and isolation.

Outbreaks

Testing and Exclusion. Employees who had close contacts must test negative or be excluded from the workplace until the return to work requirements for COVID-19 cases in are met. (Cal. Code Regs., tit. 8, § 3205.1(b)(2)(C))

Partitions/barriers. Employers no longer need to consider the use of barriers or partitions to reduce COVID-19 transmission in outbreaks. These requirements have been deleted. (Cal. Code Regs., tit. 8, § 3205.1(d)(3))

Major Outbreaks

Testing and Exclusion. All employees in the exposed group must test negative or be excluded from the workplace until the return to work requirements for COVID-19 cases in are met. (Cal. Code Regs., tit. 8, § 3205.2(b))

Partitions/barriers. Similar to the regular outbreak section, partition and barrier requirements have also been deleted and are no longer required. (Cal. Code Regs., tit. 8, § 3205.2(c))

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms and possible hazards to, and how:

Employees will report illness to our COVID 19 Coordinator and Principal for planning of adequate staffing and to identify if the symptom is a COVID identified symptom and if isolation/quarantine is necessary. If the illness is identified as a COVID symptom, the employee will be counseled on isolation/quarantine, return to work date, and report the absence in Ready Sub and prepare lesson plans.

Our COVID 19 Coordinator will work with the Principal to notify the local public health department of an outbreak and send notifications to staff, students, and parents.

All employees will receive regular up to date communication via email and/or school messenger for District wide applicable communication. Additionally, site and district communication will be sent to staff and families regarding positive COVID cases.

Employees can report any immediate concerns to the site Administrator and Head Custodian.

- That employees can report symptoms and hazards without fear of reprisal.
- How employees with medical or other conditions that put them at increased risk of severe COVID-19 illness can request accommodations.
- Access to COVID-19 testing when testing is required:

COVID-19 testing will continue to be made available to all employees with COVID-19 symptoms. (Cal. Code Regs., tit. 8, § 3205(c)(7)(D)).

- The COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

With the help of the COVID Coordinator, staff will be provided with options for on-site testing.

The site Administrator will communicate with their site employees that were exposed or involved in an outbreak designation and plan the for testing.

This communication will be followed up within 24 hours with the formal notice.

Testing will be offered on site within 24 hours for exposed employees or in an outbreak.

Information about COVID-19 hazards has been communicated through signage, notes, and calls home, as well as various technology notifications.

Templated notifications have been developed and distributed.

Record keeping procedures are in place, and employees and students are notified when they are required to quarantine and for what duration.

The staff has received training in social distancing, mask wearing, frequent hand washing and sanitizing, and confidentiality requirements. They have been instructed to contact the COVID Coordinator if experiencing symptoms or believe they are a close contact. Staff will be provided with options for testing on-site.

Communication will be sent via email or school messenger to affected employees and/or student's families within one day of known exposure. On-going District communication will be provided via website and/or School Messenger.

Training and Instruction

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards, and how to participate in the identification and evaluation of COVID-19 hazards.
- Information regarding COVID-19-related benefits (including mandated sick and vaccination leave) to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing, face coverings, increased ventilation indoors, and respiratory protection decrease the spread of COVID-19 and are most effective when used in combination.
- The right of employees that are not fully vaccinated to request a respirator for voluntary use, without fear of retaliation, and our policies for providing the respirators. Employees voluntarily using respirators will be trained according to section 5144(c)(2) requirements:
 - How to properly wear them.
 - How to perform a seal check according to the manufacturer's instructions each time a respirator is worn, and the fact that facial hair can interfere with a seal.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment. Since COVID-19 is an airborne disease, N95s and more protective respirators protect the users from airborne disease, while face coverings primarily protect people around the user.
 - The conditions where face coverings must be worn at the workplace.
 - That face coverings are additionally recommended outdoors for people who are not fully vaccinated if six feet of distance cannot be maintained.
 - Employees can request face coverings and can wear them at work regardless of vaccination status and without fear of retaliation.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Information on our COVID-19 policies and how to access COVID-19 testing and vaccination, and the fact that

vaccination is effective at preventing COVID-19, protecting against both transmission and serious illness or death.

- Teachers were provided videos to show their students regarding wearing of face coverings, washing of hands, and social distancing.
- Time during staff meeting was allocated to review procedures and protocols.
- A school COVID Committee will meet as needed to review needs and make recommendations as to procedures/protocols that need to be reviewed or enhanced.

Appendix D: COVID-19 Training Roster will be used to document this training.

Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees that had a close contact from the workplace until our return-to-work criteria have been met, with the following exceptions:
 - Employees who were fully vaccinated before the close contact and who do not develop COVID-19 symptoms, provided they wear a face covering and maintain six feet of physical distance from others in the workplace for 14 days following the last date of close contact.
 - COVID-19 cases who returned to work per our return-to-work criteria and have remained free of COVID-19 symptoms do not need to be excluded from the workplace for 90 days after the initial onset of COVID-19 symptoms, provided they wear a face covering and maintain six feet of distance from others in the workplace for 14 days following the last date of close contact.
 - COVID-19 cases who returned to work per our return-to-work criteria who never developed COVID-19 symptoms do not need to be excluded from the workplace for 90 days after the first positive test, provided they wear a face covering and maintain six feet of distance from others in the workplace for 14 days following the last date of close contact.
- If we do not exclude an employee who had a close contact as permitted by the above three exceptions, we will provide the employee with information about any applicable precautions recommended by CDPH for individuals with close contact.
- For employees excluded from work, continuing, and maintaining employees' earnings, wages, seniority, and all other employees' rights and benefits. This will be accomplished by

Access to District provided sick leave

Access to differential pay when eligible

Access to another other federal and/or state provided COVID-19 leave (when applicable)

Coordination with other benefits if the employee is entitled to such benefits such as disability leave

- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases and outbreaks at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
 - Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with section 3203(b).
 - Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
 - Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases.
-
- If required by law, templates have been established and are utilized to report and monitor each individual's identified symptoms, testing (as appropriate), and checklists to insure protocols are followed.
 - A template has been established and, if required by law, is utilized to report to the County Health Department students or staff who test positive. County Health protocols are followed in regards to quarantine.

Return-to-Work Criteria

- **COVID-19 cases with symptoms** will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 °F. or higher has resolved without the use of fever-reducing medications, and
 - COVID-19 symptoms have improved, and
 - At least 10 days have passed since COVID-19 symptoms first appeared.
- **COVID-19 cases who tested positive but never developed symptoms** will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work once the requirements for “cases with symptoms” or “cases who tested positive but never developed symptoms” (above) have been met.
- Persons who had a close contact may return to work as follows:
 - Close contact but never developed symptoms: after 14 days have passed since the last known close contact unless either of the following exceptions apply:
 - Ten days have passed since the last known close contact and the person wears a face covering and maintains six feet of physical distance from others while at the workplace for 14 days following the last date of close contact.
 - Seven days have passed since the last known close contact; the person tested negative for COVID-19 using a COVID-19 test with the specimen taken at least five days after the last known close contact; and the person wears a face covering and maintains six feet of physical distance from others while at the workplace for 14 days following the last date of close contact.
 - Close contact with symptoms: when the “COVID-19 cases with symptoms” criteria (above) have been met.
- If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted.

Title of Owner or Top Management Representative

Signature

Date

Appendix A: Identification of COVID-19 Hazards

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, trainings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing stationary work.

Person Conducting the Evaluation:

Date:

Name(s) of Employees and Authorized Employee Representative that Participated:

Interaction, area, activity, work task, process, equipment and material that potentially exposes employees to COVID-19 hazards	Places and times	Potential for COVID-19 exposures and employees affected, including members of the public and employees of other employers	Existing and/or additional COVID-19 prevention controls, including barriers, partitions and ventilation

Appendix B: COVID-19 Inspections

Date:

Name of Person Conducting the Inspection:

Work Location Evaluated:

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Engineering			
Ventilation (amount of fresh air and filtration maximized)	Good	Maintenance Team	
Additional room air filtration	Good	Maintenance Team	

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Administrative			
Surface cleaning and disinfection (frequently enough and adequate supplies)	Good	Custodians	
Hand washing facilities (adequate numbers and supplies)	Good	Custodians	
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions	Good	Custodians	

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
PPE (not shared, available and being worn)			
Face coverings (cleaned sufficiently often)	Good	Principal/Staff	
Gloves	Good	Principal/Staff	
Face shields/goggles	Good	Principal/Staff	
Respiratory protection	Good	Principal/Staff	

*Identify and evaluate how to maximize ventilation with outdoor air; the highest level of filtration efficiency compatible with the existing ventilation system; and whether the use of portable or mounted HEPA filtration units, or other air cleaning systems, would reduce the risk of COVID-19 transmission. Review applicable orders and guidance from the State of California and local health departments related to COVID-19 hazards and prevention have been reviewed, including the CDPH Interim Guidance for Ventilation, Filtrations, and Air Quality in Indoor Environments and information COVID-19 Prevention Program

specific to your industry, location, and operations. We maximize the quantity of outside air provided to the extent feasible, except when the United States Environmental Protection Agency (EPA) Air Quality Index is greater than 100 for any pollutant or if opening windows or maximizing outdoor air by other means would cause a hazard to employees, for instance from excessive heat or cold.

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or persons with COVID-19 symptoms, and any employee required medical records will be kept confidential unless disclosure is required or permitted by law. Un-redacted information on COVID-19 cases will be provided to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH) immediately upon request, and when required by law.

Date:

Name of Person Conducting the Investigation:

Name of COVID-19 case (employee or non-employee*) and contact information:		Occupation (if non-employee, why they were in the workplace):	
Names of employees/representatives involved in the investigation:		Date investigation was initiated:	
Locations where the COVID-19 case was present in the workplace during the high-risk exposure period, and activities being performed:		Date and time the COVID-19 case was last present and excluded from the workplace:	
Date of the positive or negative test and/or diagnosis:		Date the case first had one or more COVID-19 symptoms, if any:	
Information received regarding COVID-19 test results and onset of symptoms (attach documentation):			

Summary determination of who may have had a close contact with the COVID-19 case during the high-risk exposure period. Attach additional information, including:

- The names of those found to be in close contact.
- Their vaccination status.
- When testing was offered, including the results and the names of those that were exempt from testing because:
 - They returned to work per our return-to-work criteria and have remained symptom free for 90 days (or a different period than 90 days if it is required by a CDPH regulation or order) or, for those that never developed symptoms, for 90 days (or a different period than 90 days if it is required by a CDPH regulation or order) after the initial positive test.
- The names of those close contacts that were excluded per our Exclusion of COVID-19 Cases and Employees who had a Close Contact requirements.
- The names of those close contacts exempt from exclusion requirements because:
 - They were fully vaccinated before the close contact and did not develop COVID-19 symptoms, and are required to wear a face covering and maintain six feet of distance from others at the workplace for 14 days following

the last date of close contact.

- They returned to work per our return-to-work criteria and have remained symptom free, and are required to wear a face covering and maintain six feet of physical distance from others at the workplace for 14 days following the last date of close contact.
- They never developed symptoms and are required to wear a face covering and maintain six feet of physical distance from others at the workplace for 14 days following the last date of close contact.

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:			
All employees who may have had COVID-19 exposure and their authorized representatives.	Date:		
	Names of employees that were notified:		
Independent contractors and other employers present at the workplace during the high-risk exposure period.	Date:		
	Names of individuals that were notified:		
What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?		What could be done to reduce exposure to COVID-19?	
Was local health department notified?		Date:	

*Should an employer be made aware of a non-employee infection source COVID-19 status.

Appendix D: COVID-19 Training Roster

Date:

Name of Person Conducting the Training:

Employee Name	Signature

Appendix E: Documentation of Employee COVID-19 Vaccination Status - CONFIDENTIAL

Employee Name	Fully or Partially Vaccinated	Method of Documentation

1. Update, accordingly and maintain as confidential medical record. T8CCR section 3205(b)(9) definition of “fully vaccinated” will be applied.

2. Acceptable options include:

- Employees provide proof of vaccination (vaccine card, image of vaccine card or health care document showing vaccination status) and employer maintains a copy.
- Employees provide proof of vaccination. The employer maintains a record of the employees who presented proof, but not the vaccine record itself.
- Employees self-attest to vaccination status and employer maintains a record of who self-attests.

Additional Consideration #1

Multiple COVID-19 Infections and COVID-19 Outbreaks

This addendum will stay in effect until there are no new COVID-19 cases detected in the exposed group for a 14-day period.

COVID-19 testing

We provide COVID-19 testing at no cost to all employees, during paid time, in our exposed group except for:

- Employees who were not present during the relevant 14-day period.
- COVID-19 cases who did not develop symptoms after returning to work pursuant to our return-to-work criteria, no testing is required for 90 days after the initial onset of symptoms or, for COVID-19 cases who never developed symptoms, 90 days after the first positive test.

COVID-19 testing consists of the following:

- All employees in our exposed group are immediately tested and then again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine, isolation, or exclusion period required by, or orders issued by, the local health department.
- After the first two COVID-19 tests, we continue to provide COVID-19 testing once a week of employees in the exposed group who remain at the workplace, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
- We provide additional testing when deemed necessary by Cal/OSHA.

We continue to comply with the applicable elements of our CPP, as well as the following:

1. Employees in the exposed group wear face coverings when indoors, or when outdoors and less than six feet apart (unless one of the face-covering exceptions indicated in our CPP apply).
2. We give notice to employees in the exposed group of their right to request a respirator for voluntary use if they are not fully vaccinated.
3. We evaluate whether to implement physical distancing of at least six feet between persons, or where six feet of physical distancing is not feasible, the need for use of cleanable solid partitions of sufficient size to reduce COVID-19 transmission.

COVID-19 investigation, review and hazard correction

We immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review is documented and includes:

- Investigation of new or unabated COVID-19 hazards including:
 - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
 - Our COVID-19 testing policies.
 - Insufficient outdoor air.
 - Insufficient air filtration.
 - Lack of physical distancing.
- Updating the review:
 - Every thirty days that the outbreak continues.

- In response to new information or to new or previously unrecognized COVID-19 hazards.
- When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review. We will consider:
 - Moving indoor tasks outdoors or having them performed remotely.
 - Increasing outdoor air supply when work is done indoors.
 - Improving air filtration.
 - Increasing physical distancing as much as possible.
 - Respiratory protection.

Buildings or structures with mechanical ventilation

We will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters, if compatible with the ventilation system. If MERV-13 or higher filters are not compatible, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units or other air cleaning systems would reduce the risk of transmission and, if so, implement their use to the degree feasible.

Additional Consideration #2

Major COVID-19 Outbreaks

This addendum will stay in effect until there are fewer than three COVID-19 cases detected in our exposed group for a 14-day period.

We continue to comply with the Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, except that the COVID-19 testing, regardless of vaccination status, is made available to all employees in the exposed group twice a week, or more frequently if recommended by the local health department.

In addition to complying with our CPP and Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, we also:

- Provide employees in the exposed group with respirators for voluntary use in compliance with section 5144(c)(2) and determine the need for a respiratory protection program or changes to an existing respiratory protection program under section 5144 to address COVID-19 hazards.
 - Separate by six feet (except where we can demonstrate that six feet of separation is not feasible and there is momentary exposure while persons are in movement) any employees in the exposed group who are not wearing respirators required by us and used in compliance with section 5144. When it is not feasible to maintain a distance of at least six feet, individuals are as far apart as feasible
-
- Install cleanable solid partitions that effectively reduce transmission between the employee and other persons at workstations where an employee in the exposed group is assigned to work for an extended period, such as cash registers, desks, and production line stations, and where the physical distancing requirement (described above) is not always maintained.
 - Evaluate whether to halt some or all operations at the workplace until COVID-19 hazards have been corrected.
 - Implement any other control measures deemed necessary by Cal/OSHA.

Additional Consideration #3

COVID-19 Prevention in Employer-Provided Housing

Assignment of housing units

We, to the extent feasible, reduce employee exposure to COVID-19 by assigning employee residents to distinct groups and ensure that each group remains separate from other such groups during transportation and work. Shared housing unit assignments are prioritized in the following order:

- Residents who usually maintain a household together outside of work, such as family members, will be housed in the same housing unit without other persons.
- Residents who work in the same crew or work together at the same workplace will be housed in the same housing unit without other persons.
- Employees who do not usually maintain a common household, work crew, or workplace will be housed in the same housing unit only when no other housing alternatives are feasible.

Ventilation

We ensure maximization of the quantity and supply of outdoor air and increase filtration efficiency to the highest level compatible with the existing ventilation system in housing units. If there is not a Minimum Efficiency Reporting Value (MERV) 13 or higher filter in use, portable or mounted HEPA filtration units are used, where feasible, in all sleeping areas.

Face coverings

We provide face coverings to all residents and provide information to residents on when they should be used in accordance with state or local health officer orders or guidance.

Cleaning and disinfection

We will ensure that:

- Housing units, kitchens, bathrooms, and common areas are effectively cleaned to prevent the spread of COVID-19. Housing units, kitchens, bathrooms, and indoor common areas are cleaned and disinfected after a COVID-19 case was present during the high-risk exposure period, if another resident will be there within 24 hours of the COVID-19 case.
- Cleaning and disinfecting is done in a manner that protects the privacy of residents.
- Residents are instructed to not share unwashed dishes, drinking glasses, cups, eating utensils, and similar items.

Screening

We will encourage residents to report COVID-19 symptoms to:

COVID-19 testing

We establish, implement, maintain and communicate to residents' effective policies and procedures for COVID-19 testing of residents who had a close contact. All residents will be tested should there be three or more COVID-19 cases in 14 days.

COVID-19 cases and close contacts

We:

- Effectively quarantine residents who have had a close contact from all other residents. Effective quarantine includes providing residents who had a close contact with a private bathroom and sleeping area, except for COVID-19 cases who have met our return-to-work criteria and have remained asymptomatic:
 - For 90 days after the initial onset of symptoms,
 - For 90 days after the first positive test for COVID-19 cases who never developed symptoms.
- Effectively isolate COVID-19 cases from all residents who are not COVID-19 cases. Effective isolation includes housing COVID-19 cases only with other COVID-19 cases and providing COVID-19 case residents with a sleeping area and bathroom that is not shared by non-COVID-19-case residents.
- Keep confidential any personal identifying information regarding COVID-19 cases and persons with COVID-19 symptoms, in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.
- End isolation in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria**, and any applicable local or state health officer orders

Additional Consideration #4

COVID-19 Prevention in Employer-Provided Transportation to and from Work

Assignment of transportation

To the extent feasible, we reduce exposure to COVID-19 hazards by assigning employees sharing vehicles to distinct groups and ensuring that each group remains separate from other such groups during transportation, during work activities, and in employer-provided housing. We prioritize shared transportation assignments in the following order:

- Employees residing in the same housing unit are transported in the same vehicle.
- Employees working in the same crew or workplace are transported in the same vehicle.
- Employees who do not share the same household, work crew or workplace are transported in the same vehicle only when no other transportation alternatives are feasible.

Face coverings and respirators

We will ensure that the:

- Face covering requirements of our CPP **Face Coverings** are followed for employees waiting for transportation, if applicable.
- All employees are provided with a face covering, which must be worn unless an exception under our CPP Face Coverings applies.
- Upon request, we provide respirators for voluntary use in compliance with subsection 5144(c)(2) to all employees in the vehicle who are not fully vaccinated.

Screening

We develop, implement, and maintain effective procedures for screening and excluding drivers and riders with COVID-19 symptoms prior to boarding shared transportation.

Cleaning and disinfecting

We will ensure that:

- All high-contact surfaces (door handles, seatbelt buckles, armrests, etc.) used by passengers are cleaned to prevent the spread of COVID-19 and are cleaned and disinfected if used by a COVID-19 case during the high-risk exposure period, when the surface will be used by another employee within 24 hours of the COVID-19 case.
- All high-contact surfaces used by drivers, such as the steering wheel, armrests, seatbelt buckles, door handles and shifter, are cleaned to prevent the spread of COVID-19 between different drivers and are disinfected after use by a COVID-19 case during the high-risk exposure period, if the surface will be used by another employee within 24 hours of the COVID-19 case.

- We provide sanitizing materials, training on how to use them properly, and ensure they are kept in adequate supply.

Ventilation

We ensure that vehicle windows are kept open, and the ventilation system is set to maximize outdoor air and not set to recirculate air. Windows do not have to be kept open if one or more of the following conditions exist:

- The vehicle has functioning air conditioning in use and excessive outdoor heat would create a hazard to employees.
- The vehicle has functioning heating in use and excessive outdoor cold would create a hazard to employees.
- Protection is needed from weather conditions; such as rain or snow.
- The vehicle has a cabin air filter in use and the U.S. EPA Air Quality Index for any pollutant is greater than 100.

Hand hygiene

We provide hand sanitizer in each vehicle and ensure that all drivers and riders sanitize their hands before entering and exiting the vehicle. Hand sanitizers with methyl alcohol are prohibited.
