

Montgomery County Public Schools
Annual Asbestos Notification Memo

TO: PTA Representatives/Parents/Staff

FROM: MCPS Facilities Department

SUBJECT: ASBESTOS MANAGEMENT PLAN NOTIFICATION

The Asbestos Hazard Emergency Act (AHERA) requires that each school in the nation develop an asbestos management plan. An environmental engineering firm completed a study to determine the presence and location of all friable and non-friable asbestos materials in all public schools within the Montgomery County Public School (MCPS) System. All buildings have been inspected and are scheduled for re-inspection in accordance with Environmental Protection Agency guidelines for asbestos-containing materials (i.e., 40 CFR Part 763).

An updated copy of the management plan is available in the administrative offices of each school/facility or at the MCPS Facilities Department. The plan will contain information regarding past asbestos actions taken.

Should you have questions or concerns in regard to the above information, please call the MCPS Facilities Department at 540-382-5141.
